

Company Overview

Axis Bio is a preclinical CRO with a focus in oncology, respiratory disease and inflammation. Our range of *in vitro* and *in vivo* services, coupled with downstream laboratory analysis including flow cytometry, histology, ELISA, Western blot, QPCR and blood biochemistry, enables **Axis Bio** to provide robust, quality data to our clients.

About Us

- A commercial, privately owned CRO founded in 2013 and based in Northern Ireland.
- Committed to generating robust, quality data.
- Servicing a range of client types from virtual/semi-virtual development companies, biotechs, academia and pharmaceutical organisations.
- Adopting a consultative approach, we provide input where necessary on programme designs and the overall optimal plan for your compound.
- Operating on a fee-for-service basis, we offer our experience and expertise at competitive rates.

Our Services

Oncology

- *In Vivo* Pharmacology
- Xenograft models
- Syngeneic models for Immuno-Oncology
- *In vitro* assays/cell biology

Inflammation

- *In Vivo* Pharmacology
- General Inflammation models
- Rheumatoid Arthritis
- Inflammatory Bowel Disease
- Fibrosis

Respiratory Disease

- *In Vivo* Pharmacology
- Pulmonary Fibrosis
- Asthma
- COPD
- Emphysema

We offer tailored designs to develop the optimal pathway of studies for your compound.
